TERMS & CONDITIONS

All prices in this catalogue are AUD and include 10% GST and effective from April 2025. While correct at time of publication prices are subject to change without notice. For items not listed in this catalogue please note that a minimum 25% deposit will be required upon ordering.

Mail and freight orders are accepted. Please contact The Clay Shed prior to ordering should pricing confirmation be required. Freight costs are not fixed, and are based on the order's size and weight, and fluctuating fuel levies.

Goods will only be accepted for return if prior arrangement has been obtained within 7 days of receipt of goods. All returns will be subject to a 10% restocking fee. Title and ownership of goods does not pass to the purchaser until payment in full has been made. Until such time goods remain the property of The Clay Shed.

All materials should be sampled for their suitability prior to use. It is important to prove their effectiveness under the particular conditions that they are to be subjected to.

Sun Clay Air Hardening Clay

No need for firing, dries hard!

Red or White available

Great for modelling, throwing, sculpting and hobby projects. Dries leather hard in 24 hours and rock hard within several days (actual drying time varies with temperature, humidity and thickness of clay).

Decorate with acrylic paints. Must be sealed with a commercial water sealant to be water resistant.

LIQUITEX SEALING/EXTENDING MEDIUMS

GLAZING MEDIUM

For creating brilliant jewel like glazes with acrylic artist colours. Mix with any amount of acrylic colour. Small quantities of colour provide the most transparency. Works best with transparent or translucent colours. Flexible, non-yellowing and water resistant when dry

GLOSS MEDIUM & VARNISH

Increases surface gloss, colour depth and transparency. Maintains paint adhesion, durability and quality. Permanent, non-yellowing, flexible & non-cracking. Water-resistant when dry. Semi-opaque when wet, transparent when dry. Mix with Matte Medium to create a custom satin fluid medium.

MATTE MEDIUM

Creates a matte, non-reflecting finish when added to acrylic colours. Mix into any acrylic paint to increase transparency and extend colour, increase matte sheen, add flexibility and adhesion. Opaque when wet, translucent when dry.

COLOUR SHOULD BE APPLIED AS THINLY AS POSSIBLE, IN LAYERS, TO ACHIEVE THE DESIRED EFFECT. IF WATER HAS BEEN LOST A LITTLE MORE MAY BE ADDED BUT BE CAREFUL NOT TO DILUTE COLOUR POWER. APPLICATION GIVES A TRANSLUCENT EFFECT WITH 1 COAT, SEMI OPAQUE WITH 2 COATS AND OPAQUE WITH 3 COATS.

COLOUR IS BRIGHTEST WHEN CLEAR GLAZED AND FIRED TO CONE 4 OR 5 (APPROXIMATELY 1180 DEGREES CELSIUS / 2150 DEGREES FAHRENHEIT), BUT FULL GLAZE FIRING RANGE IS CONE 04 TO CONE 9 (APPROXIMATELY 1050 TO 1270 DEGREES CELSIUS)

Kiwi Underglaze is a full palette of 50 vibrant, fluxed colours based on powdered ceramic stains. It is suitable for applying directly onto greenware or bisqueware. They perform well at earthenware, midrange and stoneware temperatures.

Underglazes are decorative colours applied to ware before the application of glaze, or they can be put over glaze (prior to firing), they can also be considered as a “paint for clay”.

Wunder UNDERGLAZES 1000 - 1280°C

- Australia's Classic High Quality Budget Underglazes giving first class opaque results on all clays.
- Easy to apply - gives opaque result in 1-2-3 coats - like poster paint for Clay.
- Can be applied to greenware or bisque
- Colours will start to "self glaze" from 1150oC.
- Ready for application straight from the container.

GRAFFITO UNDERGLAZE TRANSFER PAPER

Available in 8 colours

\$8.90/ sheet

Brown Green Orange Pink

Red Turquoise Violet Yellow

Graffito works exactly like carbon paper. The Graffito sheets are embedded with a ceramic underglaze that will transfer to bisqueware when drawn upon using a stylus, ballpoint pen or pencil. This means that any image or photograph can be transferred to your ceramic piece. However, unlike carbon paper, Graffito colours remain after firing.

Graffito is designed to be put only on bisqueware. The pressure of the pencil/pen may indent the clay if it is used on greenware or leather hard clay. The medium is ideally suited for flat items like tiles, plates and trivets.

All colours except Pink (cone 06 to 4) can be fired from cone 06 to cone 8. Each sheet is a 23cm square.

Plain carbon tracing paper sheets also available \$2.50 / sheet

Use to draw patterns onto clay that won't repel colours and will burn away after firing.

Great for 'paint by numbers' style decorating on bisqueware.

TRANSFER PAPERS (IMPORTED)

Works on all stages of clay! (soft, medium, leather hard, bone dry and bisque)

Temperature Range: Cone 06-10. Zinc-free Clear Glaze Recommended.

Do not glaze inside or bottom of ware. Thinner coats tend to produce greater metallic effects. Fire to cone 06 (1010°C) and hold for 5 minutes. Remove ware from kiln with tongs. Place ware into metal lidded container with combustible materials. Place lid on immediately to reduce oxygen. The combustible materials will produce flames and smoke. Leave in container until cool, approximately 20 minutes and remove. After ware has completely cooled use water and a scouring pad to clean; cleaning will improve the lustre and colours in the fired finish. Actual fired results will vary according to choice of clay.

Two Phase Connections

Two Phase power is where there are two or more meters and power connections. This is normally 3 phase power with only 2 of the pins being live. There are some places that have just 2 phases connected. Please note that the connection utilises a common neutral and is known as a star connection at 230v. It is not traditional 400v.

We recommend talking with your Electrician about having the appropriate connection installed. We are also happy to answer any of your Electrician's question directly if they contact us (02) 9066 8666. Visit Sparky Direct for an affordable distributor

	32amp		5 Pin 3 Phase 32amp Plug (L1 & L3 Live) My Big Kiln 310L

Three Phase Connections

Three Phase power is a traditional industrial type of power installation, there are however many homes that have this connected often for air conditioners or electric motors. You will normally have at least 3 phases if you have this type of power (Can be different in Country areas). Please note that the connection utilises a common neutral and is known as a star connection at 230v. It is not 400 volts across the phases and will require a 5 pin plug, not 4 pin. We recommend talking with your Electrician about having the appropriate connection installed. We are also happy to answer any of your Electrician's question directly if they contact us (02) 9066 8666. Visit Sparky Direct for an affordable distributor

	32amp		5 Pin 3 Phase 32 amp Plug My Massive Kiln 500L

Single Phase Connections

Single Phase Power is the typical power installed in homes. There are, however, a number of different sized connections that can be installed in the home. A normal power point is only 10amps. All of our Kilns require larger connections similar to the connection for an Air Conditioner, Water Heater or Kitchen Oven. Below is a listing of size connection and kiln models. We recommend talking with your Electrician about having the appropriate connection installed. We are also happy to answer any of your Electrician's question directly if they contact us (02) 9066 8666. Visit Sparky Direct for an affordable distributor

The Three Cone System

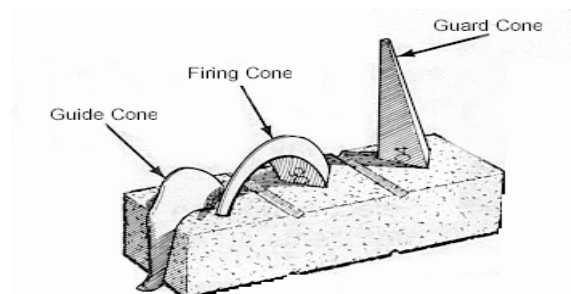

While a single cone may be used on a shelf to “witness” the firing, it is recommended to use three different cones.

The group consists of a Firing Cone - the desired cone for the ware being produced; the Guide Cone - one cone number cooler; and the Guard Cone - one cone number hotter than the Firing Cone.

These cones need to be set deep in the kiln, yet should be visible through the bung hole.

When the Guide Cone starts to bend, the ware is approaching maturity.

The bending of the Firing Cone indicates that the firing is at its correct stage. If the Guard Cone has bent, the firing has passed its best time-temperature window.
